

# **Ducati Panigale V4 S 2025 even more exclusive and high-performance thanks to Carbon and Carbon Pro trims**

Carbon Pro

Carbon

Carbon Pro

The Panigale V4 S 2025, the seventh-generation Ducati Superbike, is enriched with two new configurations aimed at those who want an even more exclusive, beautiful and high-performance bike. The two Carbon and Carbon Pro trims improve the Panigale V4 S's nimbleness and braking performance and emphasize its racing image.

The Carbon trim includes five-spoke carbon fibre rims, homologated for two-seaters, which reduce the weight by 0.950 kg compared to the forged ones of the Panigale V4 S, lowering the moment of inertia by 12% at the front and 19% at the rear. Thanks to these rims, the Panigale becomes more nimble in changes of direction and improves the already excellent tendency of the bike to close the trajectory. The trim also includes front and rear mudguards and a pair of double-profile carbon fibre winglets, which enhance the line of the Panigale V4 and bring the overall weight saving to 1 kg.

The Carbon Pro trim adds the exclusive Front Brake Pro front braking system to the Carbon components, consisting of two finned Brembo T-Drive discs with a diameter of 338.5 mm and a thickness of 6.2 mm, which increase braking power and performance consistency. These discs, used by the Ducati riders in the 2024 Race of Champions, are derived from the racing discs chosen in the Superbike World Championship on the most demanding circuits, and are coupled with Hypure™ calipers. The latter are equipped with a titanium-coloured anodization treatment and an oversized Brembo logo. Finally, the front brake pump is an MCS 19.21 with remote brake lever position adjustment, as is the case on the MotoGP and Superbike.

The two trims are visible in detail [in the dedicated section of the Ducati.com website](#), and can already be selected [on the new configurator](#), where enthusiasts can create their own Panigale V4 S according to their preferences. They can then send it to their trusted dealer to get a quote, or virtually photograph it in Full-HD to save the image on their computer or smartphone or to share it with their community. Deliveries of the Panigale V4 S with Carbon trim will begin in June in Italy and Europe. The Panigale V4 S

Carbon and Carbon Pro will not be distributed in North America. Check with your local dealer network for availability in your country.
